

This is Ava, a beautiful 2-year-old who was diagnosed on 9/12/17 with a rare cancer, Neuroblastoma. She is stage 4, the most advanced and aggressive form of this rare cancer, her parents, are overwhelmed with sadness and determined to do everything in their power to make Ava well again.

Her battle has begun, Ava has undergone all of her 6 rounds of chemotherapy which did shrink the tumor in her neck however she still has to complete radiation therapy and to be monitored for any additional tumors. Ava is a very strong little girl that her and her family have been through a lot during this process.

We are asking for help to offset the enormous medical bills that they have occurred. Her parents are focusing all their love, attention, strength and efforts on helping Ava get well. Anything at all that you can donate will be very appreciated. We are also asking that you please pray for Ava to be cured from this terrible disease. No child or parent should ever have to go through this.
